

# Bellman's Cart Design

The design of the bellman's cart frame is critical to its overall structure and stability. Our frames have evolved into the most durable design on the market.

Fully welded joints for increased stability

Hardware and tools included for easy installation

Frame fits down inside deck at all four corners for extra stability and durability

Bolt securing frame

Frame secures independently of wheels for added overall stability

## Benefits of a Hospitality 1 Source Bellman's Cart Design

***“Ever Secure” Frame Fit:*** Recessed design allows bottom inch of frame to fit inside deck instead of directly on top. This ensures added stability while the bellman's cart is in use and, in turn, alleviates stress reducing the possibility of damage to frame welds.

***Offset Wheels:*** Wheel placement allows for a separate bolt connection for frame. Combined with oversized hardware, this assures the frame will be secured to the deck.

***Durable Hardware:*** Oversized hardware ensures easy installation and secure fit.

***Made For Luxury:*** Get the durability and stability of a cart made for luxury properties on all Hospitality 1 Source bellman's carts.
